DETAILED ACTION

Response to Amendment

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species I, drawn to a method of tracking the orientation of a sensor comprising measuring angular velocity of the sensor to produce an estimate of sensor orientation (page 4, lines 16-18).

II. Species II, drawn to a method of tracking the orientation of a body limb segment of a tracked subject compared to sensor orientation (page 6, lines 1-10).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2863

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Donald Lincoln on 5/3/04 a provisional election was made without traverse to prosecute the invention of I, claims 5, 12, 19, 29, and 45-48. Affirmation of this election must be made by applicant in replying to this Office action. Claim 49 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Lincoln on 6/4/04.

Claim 45, line 14, replace the phrase "usingreduced" with the phrase -using reduced-.

Claim 46, line 2, delete the phrase "of Claim I".

Claim 48, line 2, replace "3X" with -3-.

Please cancel claims 1-4, 6-11, 13-18, 20-28, 30-44, and 49.

Art Unit: 2863

Allowable Subject Matter

Claims 5, 12, 19, 29, and 45-48 are allowed.

The reason for allowance of the new submitted claims 45-48 is the inclusion of minimization of the criterion function from comparing the measurement with the computed measurement vector of local magnetic field and local gravity field using reduced order Gaussian-Newton iteration.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan M Le whose telephone number is (571) 272-2276. The examiner can normally be reached on Monday through Friday from 9:00 A.M. to 5:30 P.M..
